

# what is RedERP

RedERP is a **cloud-based business management software that integrates various functions like sales, inventory, and accounting into a single platform**.

It offers a suite of modules to help companies streamline operations, including CRM, eCommerce, AI-powered analytics, and project management. Its goal is to provide an accessible and integrated solution for businesses looking to improve efficiency and gain real-time insights.

## Key features

**Integrated modules:** Provides a unified platform for all business operations, such as sales, procurement, inventory, and accounting.

**CRM and sales management:** Helps manage leads, customers, and sales pipelines.

**Advanced analytics:** Uses AI-powered business intelligence to provide real-time data and insights for better decision-making.

**Inventory and supply chain management:** Helps manage stock and supply chain logistics efficiently.

**eCommerce and API integrations:** Integrates with eCommerce platforms and offers API integrations for connecting with other systems.

## Who is it for?

Businesses of all sizes looking to streamline their operations.

Companies that need an all-in-one solution that combines ERP, CRM, and eCommerce.

Organizations seeking to improve efficiency, reduce errors, and gain better control over their business through integrated data.

## Coding Frameworks ?

The RedERP cloud-based business management software uses **Laravel 12** for its backend framework and **React.js** for its frontend architecture. ●

The specific technology stack is as follows:

**Backend Framework:** Laravel 12 (PHP-based)

**Frontend Framework:** React.js (JavaScript library) ●

RedERP is designed as a secure, scalable, and customizable platform covering various business functions like CRM, ATS, Finance, and inventory management. The system is hosted on a secure cloud infrastructure and adheres to industry standards such as ISO 27001 certification and GDPR compliance.
