

wordpress default spam protection plugin default

The default spam protection plugin that comes pre-installed with every WordPress installation is Akismet Anti-spam.

Akismet is designed to protect your website from comment spam by checking incoming comments against its global spam database. It analyzes millions of comments daily to improve its detection accuracy and helps keep your comment section clean. While Akismet is pre-installed, it requires activation and a connection to an Akismet account (which can be a free personal/non-commercial account) to function fully.
